

## 2B No 1 Smooth Surface cold rolled stainless steel sheet

Our Product Introduction

For more products please visit us on [metalsstainless-steel.com](http://metalsstainless-steel.com)

### Basic Information

- Place of Origin: China
- Brand Name: ShengQuan
- Model Number: 201/304/304L/316/316L/321/309/310

### Product Specification

- Application: Construction/ Decoration/ Industry
- Surface: 2B No.1
- Shape: Flat.sheet
- Strength: High
- Feature: Smooth And Flat
- Magnetic Properties: Non-magnetic
- Thickness: 0.5mm-20mm
- Highlight: **2B cold rolled stainless steel sheet ,  
Smooth Surface Stainless Steel Sheet,  
No.1 cold rolled stainless steel sheet**

Product Description:

One of the key features of this stainless steel sheet metal is its non-magnetic properties, which makes it ideal for use in electronic and electrical applications. The sheet metal is made from austenitic stainless steel, which is known for its excellent corrosion resistance, even in harsh environments.

The high strength of this sheet metal makes it perfect for use in construction and industrial settings. It can withstand heavy loads and is resistant to bending and warping, making it an ideal material for building structures that need to be strong and durable.

The surface of the sheet metal is finished with a 2B No.1 surface, which gives it a sleek and polished look. This finish is achieved through a process of cold rolling and annealing, which results in a smooth and uniform surface that is free from defects and imperfections.

Our Austenitic Stainless Steel Sheet Metal is a versatile and reliable product that can be used in a wide range of applications. Whether you need it for construction, decoration, or industrial purposes, this sheet metal is sure to meet your needs and exceed your expectations.

Features:

Product Name: Stainless Steel Sheet Metal

Feature: Smooth And Flat

Thickness: 0.5mm-20mm

Strength: High

Magnetic Properties: Non-magnetic

Application: Construction/ Decoration/ Industry

Material Type: Ferritic Stainless Steel Sheet Metal, Industrial Stainless Steel Sheet, Austenitic Stainless Steel Sheet Metal

Technical Parameters:

Product Attribute	Description
Product Name	Austenitic Stainless Steel Sheet Metal
Thickness	0.5mm-20mm
Feature	Smooth And Flat
Application	Construction/ Decoration/ Industry
Strength	High
Surface	2B No.1
Shape	Flat.sheet
Magnetic Properties	Non-magnetic
Description	Austenitic Stainless Steel Sheet Metal is a corrosion-resistant steel sheet with a smooth and flat surface. It is commonly used in construction, decoration, and industry due to its high strength and non-magnetic properties. The sheet comes in a flat shape and has a surface finish of 2B No.1. With a thickness range of 0.5mm to 20mm, it is a versatile product suitable for various applications.

**Applications:**

One of the key attributes of this product is its high strength, which makes it an ideal choice for construction applications. The product is also corrosion-resistant, which makes it suitable for use in environments that are exposed to harsh weather conditions and chemicals. Additionally, the product is non-magnetic, which makes it ideal for use in industries that require non-magnetic materials. The product is available with a 2B No.1 surface finish, which makes it ideal for decoration applications. The smooth and flat surface of the product gives it an elegant appearance, which makes it ideal for use in decorative applications such as wall cladding, ceiling panels, and decorative trims. The product's corrosion-resistant properties also make it suitable for outdoor applications, such as building facades. The Austenitic Stainless Steel Sheet Metal is also commonly used in the industry. This type of steel is known for its high strength, durability, and corrosion resistance. It is commonly used in the manufacturing of equipment and machinery that are exposed to harsh environments and chemicals. The product is also easy to weld, which makes it ideal for use in the fabrication of complex structures and components.

In summary, the ShengQuan stainless steel sheet metal is a versatile product that can be used in a wide range of applications. Its high strength, corrosion-resistant properties, and non-magnetic properties make it ideal for use in construction, decoration, and industrial applications. The Austenitic Stainless Steel Sheet Metal is a reliable material that can withstand harsh environments and chemicals, making it an ideal choice for industrial applications.
